

Workplace

Desk to Power

THE WORK PLACE STORY

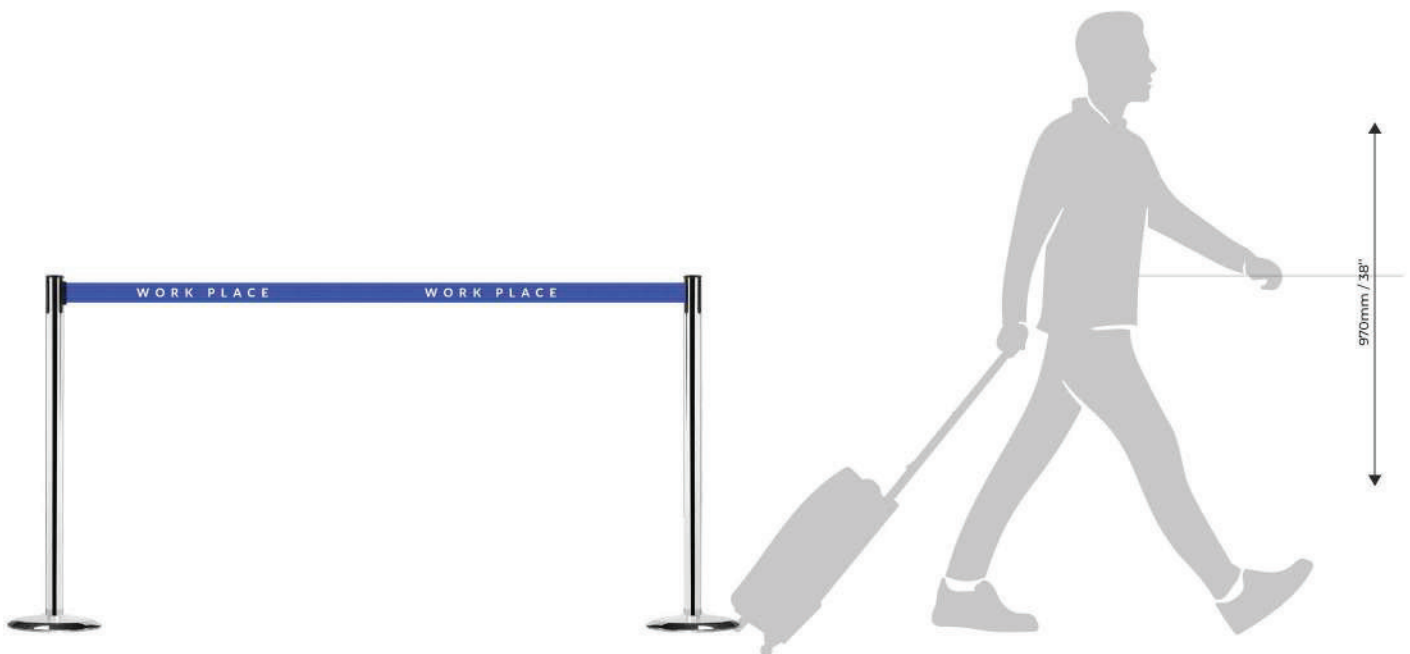

Work Place was established in 2008. The company provides offering a full range of retractable belt barriers, robust and flexible signage solutions and the latest in innovative electronic technology like call forwarding and capacity monitoring Q puts customer experience at the forefront of your business for varied type including corporate banking, corporate companies, luxury hotels, showrooms, restaurants, and commercial offices/buildings.

From helping airports to retail, attractions to schools there's a reason we're established queue management specialists. Get in touch today to see how we can help you.

Did you know?

Nobody likes a queue jumper, so the WORK PLACE has been designed and refined over its lifetime to ensure that, when extended, the webbing is set at the optimum height to prevent the average person from ducking underneath it or stepping over it. It is simple ergonomics that taller posts than WORK PLACE encourage webbing duckers, whilst shorter posts encourage step overs.

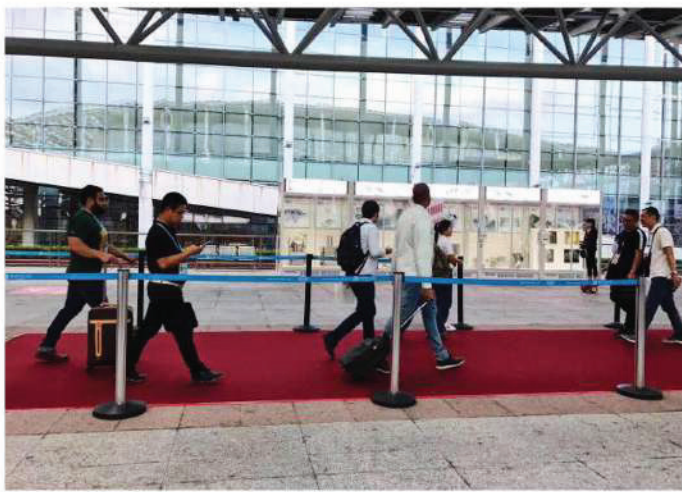

WORK PLACE Universal base has the lowest leading edge on the market improving access for people whilst queuing. In busy environments with several barriers the new Universal base will significantly improve the experience of your customers and will not place a disabled person at a disadvantage.

CROWD CONTROL BARRIER

Crowd Control barrier includes belt barrier, rope post and outdoor plastic barrier, etc.,..

Its is mainly act as queuing management system in banks, airpots, hotels, exhibitions and other public places.

We can provide customized service in height of barrier, metal, finish and any logo required.

CROWD CONTROL SYSTEM

WORKSOCKET

LEAF

ORGANIC SIMPLICITY, USER FLEXIBILITY

The NETBOX Leaf is a surface-mounted unit designed to optimize space and adapt to desk-sharing arrangements thanks to its compact footprint and design. A simple unit to set up and use, it is securely mounted by means of Powerstrips or a table clamp and provides durable and efficient access to power and communication outlets.

This unit can be configured with 250 modules to meet any requirements and comes hardwired with a built-in starter or connector cable of customizable length. Emblematic of modern organic aesthetics, the NETBOX Leaf features fluid lines and dynamic curves with end-caps that mimic the shape of a leaf. Choose from a fascia colour of either black or signal white.

FOR USE IN:

- Executive Desks
- Training Tables
- Workstations
- Home Office
- Hotel Rooms

THE FASCIA OF THE NETBOX LEAF IS OFFERED IN EITHER BLACK OR SIGNAL WHITE COLOUR

TRASH BIN

PART 01: METAL RECYCLE TRASH BIN

Recycle trash bin is a guide for garbage sorting that can better protect our living environment.

It is made by stainless steel, which is firmer and more durable; The inner can is made by galvanized steel, which is anti-dust.

Recycle trash bin can be used both indoor, such as airport, train station, metro station and outdoor like street, park and school.

TRASH BIN

PART 05: PLASTIC TRASH BIN

Plastic trash bin can be used for both indoor and outdoor, with diversification of size and color.

Plastic trash bin can be widely used in various environments for garbage sorting & collecting. This kind of bin can be stacked when delivery, which facilitates transportation and can save space and cost.

PARK BENCH

PART 04: INDOOR TRASH BIN

Park bench is mainly used in public places such as parks, squares, streets where people can have a rest.

It is usually made by materials with characteristic of weather resistance, such as aluminum, plastic wood, carbon fiber, etc.

With strong corrosion resistance, park bench can be used outdoors for a long time and not easy to get rusty or fade.

ITEM NO:

Material: Aluminum

Product Size: 1550Lx530Wx430Hmm

Seat Size: 1450Lx559.7Wx420Hmm

Weight: 26kg

Finishes: Wood texture, Anodizing finish

ITEM NO:
